For instance there is the question as to whether these marks are definitely related to the general mental traits, capacities and development of the individual who attains them. Then, there is the problem as to whether a given grade stands simply for a certain degree of static accomplishment or whether it is a measure of functioning capacity. We cannot speak with certainty upon these and many other points, but perhaps the most important step toward clearing them up will have been taken when a number of investigators have carefully worked over the data afforded by school marks. For some purposes it may be satisfactory to gather the grades of a large number of pupils as they may rank in a single year, or semester. However, for more exact results it would certainly be better to gather material from the records of a smaller group whose work continues throughout a period of years.
