Hence we have still an easier method of drawing the perspectives of lines inclined to the plane of the picture, thus: If it be required to draw the perspective of 9, 10, continue that line to the base line at 11, from D draw DC, parallel to it; draw 11 C, D 10 and D 9 and the points of intersection 12 and 13 will represent 10 and 9. Thus also, by making PZ?Aequal to ELT, or the angle of declination, and drawing P 14 at right angles to PD and making Pp and Pc equal to P 14 may p and c be found, or the casual points of LK and MI declining upwards or downwards as aforesaid. From this proposition, and from proposition 1, it follows, that all lines parallel to feach other, and not parallel to the plane of the...
